Simply Better Connections

SP100

SNMP Card

ATEN's SP100 (SNMP card) is an UPS monitoring equipment. Allows connection of the UPS directly to the ethernet network through a RJ-45 connector without using RS-232 ports on the computer and without loading any individual UPS management software on the network server. User can remotely control the UPS and monitor UPS current status from any off site location. SP100 can communicate the status of a UPS and issue commands to it.
