# Multiply access without added costs

**Scenario:** *Bank Branch Office*

A bank purchased licensed software and installed them on 3 computers in one of their branch offices. However, they want to provide clients with 7 consoles that can simultaneously access all the resources.

## ATEN Solution

### *Digital KVM Extender Solution*

The CE790 is an IP based KVM Extender that supports high quality digital audio and video streaming from anywhere on the intranet.

## Benefits

- The CE790 enables the bank to quickly set up consoles that can connect to the computers with the resources.

- The CE790 also has an excellent frame rate that minimizes delay when accessing large data.
