

Title: International Enterprise ERP System Remote Maintenance

Product:	ATEN CN-6000 KVM on the NET
Location:	International High Technology Companies, International Online Game Servers, International Banks
Challenge:	Network administrators at the Taiwan headquarters have to frequently update China factory's ERP system
Solution:	To Install CN-6000 and KVM switches in server room in China factory. Network administrators at the Taiwan headquarters modify factory's ERP system through the internet
Advantages:	Network administrators in Taiwan headquarters don't need to travel to China. The changes they make to the ERP system take effect immediately, saving trip expenses.
