

VE805R

HDMI HDBaseT-Lite Receiver with Scaler (1080p@70m)
(HDBaseT Class B)

The VE805R HDMI HDBaseT-Lite Receiver with Scaler can be combined with ATEN HDMI HDBaseT products to extend a HDMI display up to 60 m from the HDMI source device using a single Cat 5e/6 cable or up to 70 m via a Cat 6a cable.

With a built-in scaler, the VE805R supports scaling the display of different video resolutions. When combined with the ATEN [VM8514](#) HDBaseT Output Board, it supports video wall integration and Seamless Switch™ functions. In addition, the VE805R is equipped with RS-232 and IR signalling pass-through, which allows RS-232 and IR channels to be controlled either from the remote to local unit or from the local to the remote unit, for bi-directional control of the source or display device.

2 Years Extended Warranty

Features

- HDBaseT connectivity – extends the connection between the [VM8514](#) HDBaseT outputs and an HDMI display over a long distance via single Cat 5e/6/6a cable
- HDBaseT Anti-jamming – resists signal interference during high quality video transmissions using HDBaseT technology
- Bi-directional RS-232 channel¹ – allows you to connect to serial terminals or serial devices, such as touch screens and barcode scanners
- Scaler – features a scaling function to integrate a video wall seamlessly with various output formats
- Seamless Switch™ – close-to-zero second switching that provides continuous video streams, real-time switching and stable signal transmissions²
- Video Wall – features configurable Video Wall profiles available for custom screen layouts via simple point-n-click web GUI²
- Bi-directional IR channel – IR transmission is processed one direction at a time³
- Rack-mountable

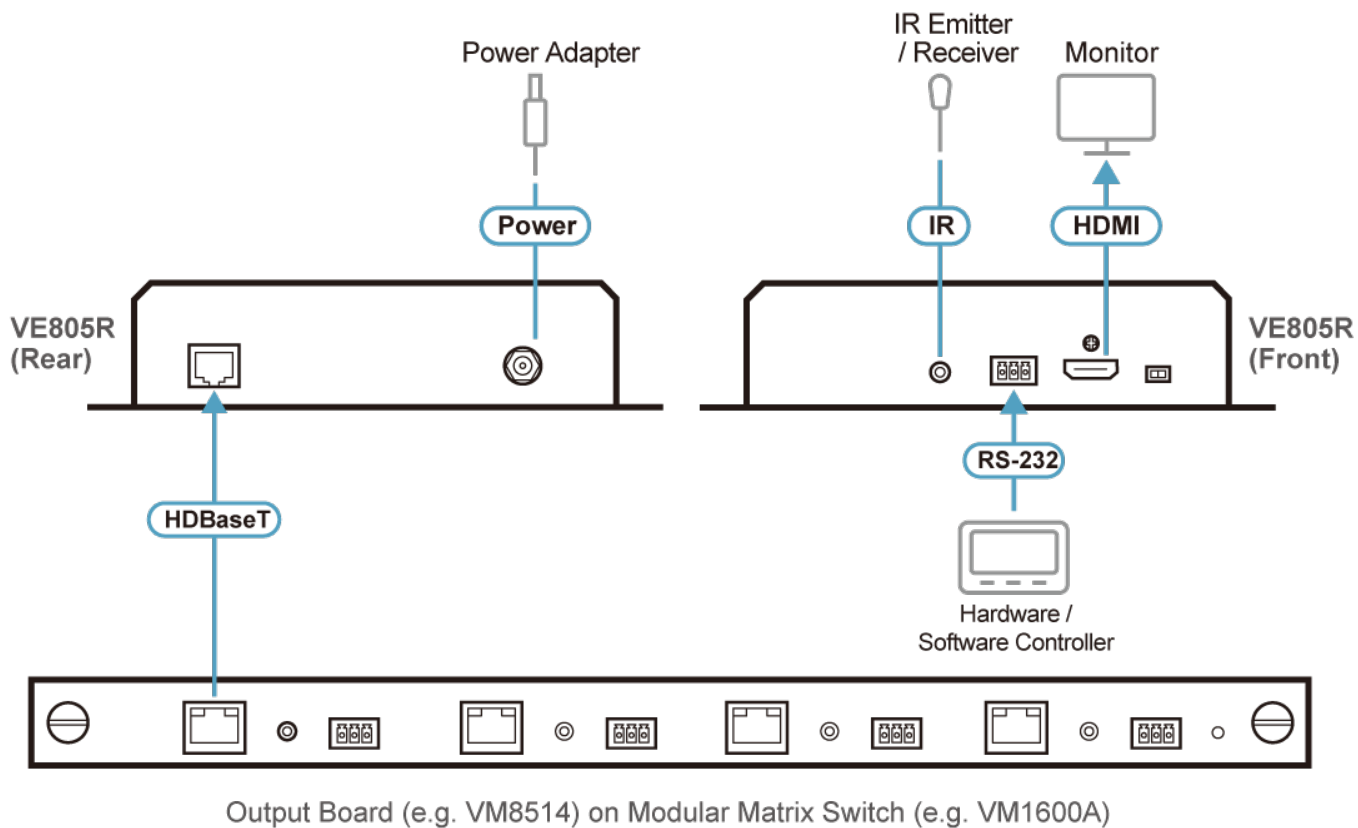

Note:

1. Bi-directional RS-232 channel only available when VE805R is used with the [VM8514](#).
2. The Seamless Switch™ and Video Wall functions are available when the VE805R is used with the [VM8514](#).
3. Supports full frequency IR signals from 30KHz to 60KHz; however the IR receiver cable included with the package only supports 30KHz to 56 KHz.
