

PE5108

15A/10A 8-Outlet 1U Metered eco PDU

- 1U 8-Outlet eco [PDU](#)
- Bank level metering

ATEN has developed a new generation of green energy power distribution units ([PDUs](#)) to effectively increase the efficiency of [data center](#) power usage. The PE5108 eco [PDUs](#) are intelligent [PDUs](#) that contain 8 AC outlets and are available in various IEC or NEMA socket configurations. They provide secure, centralized, intelligent, power management of [data center](#) IT equipment (servers, storage systems, KVM switches, network devices, serial data devices, etc.), as well as the ability to monitor the center's health environment via sensors*.

eco [PDUs](#) offer real-time power measurement - allowing you to monitor the power status of devices attached to the [PDUs](#), from practically any location via a TCP/IP connection.

eco [PDU](#) supports any 3rd party v3 SNMP Manager Software and [eco DC](#) (Energy Management Web GUI). [eco DC](#) provides you with an easy method for managing multiple devices, offering an intuitive and user friendly Graphical User Interface that allows you to configure a [PDU](#) device and monitor power status of the equipment connected to it. With [eco DC](#), the Sensor-enabled eco [PDU](#) also offers comprehensive power analysis reports which can separate by departments and locations, providing precise measurements of current, voltage, power and watt-hour in a real-time display.

With its advanced security features and ease of operation, the eco [PDU](#) is the most convenient, most reliable, and most cost effective way to remotely manage power access for multiple computer installations and allocate power resources in the most efficient way possible.

* Sensors are optional accessories. A sensor-enabled installation is required to generate a more complete energy-efficient data and chart. Higher sensor installation density is helpful to generate more accurate data.
