

## PE6216

20A/16A 16-Outlet Metered & Switched eco PDU

### PE6216A

ATEN has developed a new generation of green energy power distribution units ([PDUs](#)) to effectively increase the efficiency of [data center](#) power usage. The PE6216 eco [PDU](#)s are intelligent [PDUs](#) that contain 16 AC outlets and are available in various IEC or NEMA socket configurations.

The series provides secure, centralized, intelligent power management (power on / off / cycle) of [data center](#) IT equipment (servers, storage systems, KVM switches, network devices, serial data devices, etc.), as well as the ability to monitor the center's health environment via sensors\*.

The PE6216 eco [PDU](#) offers [remote power control](#) combined with realtime power measurement – allowing you to control and monitor the power status of devices attached to the [PDUs](#), either at the [PDU](#) device or outlet level, from practically any location via a TCP/IP connection.

The power status of each outlet can be set individually, allowing users to switch each device On/Off. The eco [PDU](#) also offers comprehensive power analysis reports – providing precise measurements of current, voltage, power and watt-hour in a realtime display.

These eco [PDUs](#) support any 3rd party v1, v2 & v3 SNMP Manager Software and ATEN [eco DC](#) (Energy & DCIM Management Web GUI). [eco DC](#) provides an easy method for managing multiple devices, offering an intuitive and user-friendly GUI that allows users to configure a [PDU](#) device and monitor power status of the equipment connected to it.

With its advanced security features and ease of operation, the eco [PDU](#) is the most convenient, most reliable, and most cost effective way to remotely manage power access for multiple computer installations and allocate power resources in the most efficient way possible.

\* Sensors are optional accessories. A sensor-enabled installation is required to generate a more complete energy-efficient data and chart.

## Features

- **Power Distribution**
- Space saving 0U rack mount design with rear mounting
- IEC or NEMA outlet models
- 3 x 7-segment front panel LED shows Current / IP Address for [PDU](#) / Bank
- Remote users can monitor [PDU](#)/Bank status via web pages on their browsers
- Safe shutdown support
- Separate power for the unit's own power and its power outlets – the user interface is still accessible even when an overload condition trips the devices' circuit breaker

### Remote Access

- Remote power control via TCP/IP and a built in 10 / 100 Ethernet port
- Network Protocols: TCP / IP, UDP, HTTP, HTTPS, SSL, SMTP, DHCP, NTP, DNS, auto sense, Ping, Telnet
- Energy & DCIM Management Web GUI – [eco DC](#)
- Supports SNMP Manager V1, V2 & V3

### Operation

- Local and Remote power outlet control (On, Off, Power Cycle) by individual outlets
- Supports multiple power control methods – Wake on LAN, System After AC Back, Kill the Power
- Power-on sequencing – users can set the power on sequence and delay time for each port to allow equipment to be turned on in the proper order
- Easy setup and operation via a browser-based user interface
- Multibrowser support (IE, Firefox, Chrome, Safari, Opera, and Netscape)
- RTC support to keep the timer running during times of no power.
- Up to 8 user accounts and 1 administrator account
- Proactive Overload Protection (POP) – automatically powers off outlets when current overloads to protect operating devices

### Management

- Power status measurement at the [PDU](#)/Bank level
- LED indicators for current and IP address at the [PDU](#) device and/or Bank levels
- Real-time aggregate current, voltage, and power and power dissipation displayed in a browser-based UI for monitoring at the [PDU](#) level
- Environment monitoring – supports external temperature / humidity / Differential Pressure sensors for rack environment monitoring
- Current and voltage threshold setting
- Naming support for outlets
- User outlet access assignment on an outlet-by-outlet basis
- Event logging and syslog support
- Upgradeable firmware
- Multilanguage support: English, Traditional Chinese, Simplified Chinese, Japanese, German, Italian, Spanish, French, Russian

### Security

- Two-level password security
- Strong security features include strong password protection and advanced encryption technologies – 128 bit SSL
- Remote authentication support: RADIUS

### [eco DC](#) Energy & DCIM Management Web GUI\*

- Automatic discovery of all PE devices within the same intranet
- Remote real-time power measurement and monitoring
- Remote real-time environment sensor monitoring
- Plotting/Monitoring of all PE devices
- Exceed threshold alert through SMTP and System log
- Power Analysis Report

\*[eco DC](#) is designed to work with [eco PDUs](#), and is bundled with all PE series packages.
