## VK2100

ATEN Control System - Control Box

The ATEN Control System, incorporating the ATEN Control Box (VK2100 or [VK1100](#)), the ATEN Configurator ([VK6000](#)) and the ATEN Control System App, is a standard Ethernet-based management system that connects all the hardware devices in a room or large facility to provide centralized control directly and effortlessly via a mobile device and tablet computer. The VK2100 Control Box works as the main controller that provides connectivity to all the hardware devices found in a room. After connecting the hardware, the [VK6000](#) Configurator software provides simple setup of the devices with easy step by step configuration. The ATEN Control System App then connects you to the VK2100 Control Box from any iOS, Android or Windows mobile device / tablet computer which empowers you with mobility to control all the hardware devices, in different rooms, whenever and however you like.

The VK2100 Control Box easily deploys into an existing installation and integrates seamlessly with ATEN VanCryst pro-A/V products and nearly any other hardware devices found in a room, including A/V equipment, lighting, conference systems, air conditioning, motion sensors, power switches and many more. The VK2100 Control Box serves as the central platform where hardware devices are connected - to be monitored, managed and controlled directly via a tailor-made GUI from any iOS, Android or Windows mobile device.

The [VK6000](#) Configurator software facilitates a quick setup and control of the devices in a few easy steps via an intuitive GUI. The [VK6000](#) walks you through configuring the hardware, designing the interface and uploading viewer profiles to the VK2100 Control Box. To provide control of the hardware devices, Viewer Profiles are imported via the ATEN Control System App from any iOS, Android or Windows mobile device. Through an Ethernet connection, the ATEN Control System App enables you to import and update Viewer Profiles from the VK2100 Control Box via a point-n-tap user interface. Each Viewer Profile provides a customized control GUI that grants you quick access to target and control hardware devices. Use of any profile is protected with password authentication to ensure system access.

The ATEN Control System is perfectly applicable in meeting rooms, conference centers, boardrooms, classrooms or any room that requires central and mobile control of a variety of hardware devices through a streamlined management system with optimum efficiency and performance.
