

ES0154P

54-Port Layer 2+ Gigabit Ethernet Managed Switch with PoE

The ES0154P 54-Port Layer 2+ Gigabit Ethernet Managed Switch is ideal for installation with ATEN KVM over IP products. It simplifies the process of building OT infrastructure with the ATEN KVM over IP series by eliminating the complexities of setup. It provides a high-performance 54-port configuration, a complete array of L2+ features, and advanced functionalities including Layer 3 static route, DHCP server, IPv6 support, and LLDP, making it a versatile solution for enhancing network performance. It offers a combination of SFP28 (fiber) and RJ-45 (copper) ports for servicing a range of network needs.

The ES0154P supports 6 (1G/10G/25G) SFP28, 48 (10M/100M/1G) RJ-45 with PoE+ (Support 802.3at/af) ports, and PoE++ (Support 802.3bt) ports (41-48 ports only). The ES0154P is equipped with Power over Ethernet (PoE) functionality, featuring a substantial 740 Watts power budget distributed across its 48 RJ-45 ports. This eliminates the necessity for external power adapters and leads to a substantial reduction in power configuration expenses.

Deploying the ES0154P is quick and hassle-free. Its plug-and-play design eliminates the need for software installation or device configuration. Just connect the transmitters and receivers to the ES0154P using Cat 5e/6 cables. With a full range of functions to help with optimizing network efficiency, manageability and reliability for their network environment, the ES0154P serves as an ideal network switch solution. It is particularly valuable in applications where connected devices play a critical role in network operation, including OT infrastructure for both SMBs and enterprises.
