

VE883T

4K HDMI Optical Transmitter (4K@300m (K1, MM) / 10km (K2, SM))

The VE883T is a fiber-based transmitter designed to extend uncompressed 4K signal up to 300 m (using VE883TK1) or 10 km (using VE883TK2) over duplex fiber optic cables. The VE883T meets HDMI Specifications, including 3D, Deep Color (up to 12 bit), and signaling rates (up to 10.2 Gb) to ensure superior video quality. With ATEN's exclusive FarSmooth technology, the VE883T prevents lagging and freezing by matching the output rates to the input rates and ensures the video display is stable, smooth and identical to the source, particularly in long-distance extension applications where uninterrupted video streams are required. The VE883T features an HDMI input, analog audio input, USB2.0, IR, RS-232 control port, and a Gigabit Ethernet port. For point-to-point extension, the VE883T can receive fiber optic cables by inserting SFP+ modules to its optic port.

To avoid bulky cable setup, the VE883T guarantees a simple and fast solution for optimum transmission of Ethernet, IR, HDMI, RS-232, and USB signals up to 10 km simply via a set of duplex optic fiber. The VE883T is also USB transparent, making it compatible with a wide range of USB peripherals.

Engineered to meet the latest trend of lossless 4K and long distance signal extension, VE883T is suitable for where long distance transmission is a must and little interference is allowed, such as in traffic station and modern office buildings.
