

# CC1000

Control Center Over the NET™

The CC1000 Control Center Over the NET<sup>™</sup> provides centralized access, administration, and management of your data centers - local and worldwide at anytime, from anywhere. This software based solution consolidates the management of your ALTUSEN " Over the NET<sup>™</sup> " devices, providing a convenient, flexible way to meet your IT infrastructure needs.

- \* Web Browser Single IP Access
- \* Tight Security Regulates User Access and Control
- \* Scalability Expands to Fit Your Individual Needs
- \* Monitoring, Diagnosis, and Resolution of Network Problems Made Easy

Dual Access - Direct or via the CC1000

Manage your servers anytime, anywhere

Adding groups, and devices, couldn't be simpler

#### Fonctionnalités

#### Secure Centralized Management

- Complete control of your enterprise consolidates the management of all ALTUSEN / ATEN IT devices
- Single IP address to securely access every device on the installation
- All devices are integrated into a single tree view for centralized access, administration, and management of a worldwide network from anywhere
   at anytime
- Web browser access over Internet/Intranet provides secure remote connections to all installed devices
- Windows and Java versions for multiplatform support

## Highlights

- · Ideal for enterprises with one or more data centers, or a number of remote offices
- · Easy to use intuitive browser-based GUI for simplified access to IT equipment in global data centers and remote offices
- Scalability Multi-user access to hundreds of ALTUSEN / ATEN IT appliances and more than ten thousand servers and serially controlled devices
- · A single login provides secure, centralized management of multiple data centers, branch offices and remote locations
- Provides centralized management, Role-Based Access and Control(RBAC), and Reporting Capabilities

## Powerful Security

- · Powerful security features that enable integration with Active Directory external authentication tools
- · Robust security policies for individual user authorization to the port level
- 128-bit SSL encryption of all data on the network
- Flexible session time-outs
- · "Strong" user name and password authentication

## Network Interfaces

- TCP/IP
- HTTP / HTTPS
- SSL
- DNS
- LDAP / LDAPS

## Software Features

- · All features including access, configuration and administration accessible
- Powerful portal-like interface provides customized permission-based groupings and device views
- ALTUSEN / ATEN IT appliance auto-discovery with device-availability status, and alarms
- Java client for multiplatform access
- Access and Control from Anywhere at Anytime
  - An array of flexible logging and reporting options with audit trails for diagnostics and troubleshooting
    View and manage active user sessions and active ports in real time
- Multiplatform support: Windows 2000 Server/2003 Server/XP/ Vista, RHEL AS 4.0 and Fedora Core 4.
- For more information about KVMs which can connect to CC1000, see Compatible KVM Table
