

MP0170

USB CPU Module

For tailored expansion options, the Matrix Plus MP Series allows you to add servers on a one-by-one basis, instead of you having to buy another KVM Switch. All that is required is a master MP0101 Matrix Plus and then you can add as many CPU modules as necessary. Whether you have USB, PS/2 or Sun systems, you can link the CPU Modules to the Master Module for complete control and maximum flexibility. This option not only offers you the most flexibility, it also occupies the least amount of rack space. If server room space is a major concern, ATEN's MP series is the perfect solution.

Features

- The Master module [MP0101M](#) (USB), and [MP0101P](#) (PS/2), [MP0101U](#) (USB) Console modules, and the [MP0131](#) (USB), [MP0120](#) (PS/2), and [MP0130](#) (Sun) CPU modules, can be chained one by one to add on PS/2, USB or SUN servers for up to a distance of 150m.
- Superior video quality- Supports resolutions up to 1280 X 1024.
- Built-in ASIC for greater reliability and compatibility.
- Live firmware upgrades.
- Add supplementary modules via daisy chaining.
