

## KH1508Ai

1-Local/Remote Shared Access 8-Port Multi-Interface Cat 5 KVM over IP Switch

The KH1508Ai Cat 5 High-Density KVM over IP Switch offers 8 computer port configurations in a 1U-high housing for convenient rack mounting. They allow local and remote operators to monitor and access the entire enterprise [data center](#) over the Internet using a web-based browser.

### [ENQUIRE A TEST NOW!](#)

The KH1508Ai features RJ-45 connectors and Cat 5e/6 cable to link to the computers and supports multiplatform. This ensures that high quality signals can travel over long distance - up to 50m without the need for [KVM extenders](#). Utilizing KVM adapter for the final linkup, the KH1508Ai permits any combination of PC, Mac, Sun computers, and serial devices to coexist on the installation.

In addition to TCP/IP connectivity, the KH1508Ai provides console ports for a locally attached USB or PS/2 console and a Laptop USB Console (LUC) – allowing access and control from the [data center](#) as well as over the net.

These switches have been designed with unique and powerful features for that enable administrators to manage their entire server room and [data center](#) devices easily and conveniently from just about anywhere in the world.

A special Message Board feature - which like an internet chat program - lets any number of remotely logged in users exchange information and communicate with each other or to cooperatively manage the installation. A [Panel Array Mode](#)™ allows monitoring of up to 8 servers at once. Other features that contribute to the switches' powerful capabilities include: Mouse DynaSync™, and Adapter ID.

With ATEN KVM over IP Switches, IT administrators can manage their server rooms and [data centers](#) from practically anywhere - minimizing travel costs and MTTR (Mean Time to Repair) – and ensuring the highest availability of [data center](#) services possible.

#### Note:

1. The video quality of KH1508Ai has been enhanced to Full HD. To distinguish between the non-FHD and FHD versions, please refer to below link: [FHD & Non-FHD Comparison Photo](#)
2. The KH1508Ai does not support [virtual media](#) even when paired with a [virtual media](#)-enabled KVM adapter.
