

## CS1942DP

2-Port USB 3.0 4K DisplayPort Dual Display KVMP™ Switch

The ATEN CS1942DP desktop KVM switch helps organize your desktop. Especially when managing a multimedia workstation at a large organization, CS1942DP provides you with instant access to two or four computers, all through a single USB keyboard, USB mouse and two DisplayPort monitors.

Advanced video support provides a better-defined DisplayPort connection with video resolutions up to 4K (4096 x 2160 / 3840 x 2160 @ 60 Hz). Incorporating dual display capability, you are allowed to enjoy a wider screen and easily switch between two or four DisplayPort systems. In addition, featuring a built-in USB 3.1 Gen 1 hub, the CS1942DP delivers unprecedented data transfer rates up to 5 Gbps, allowing you to maximize multimedia operations.

Engineered to meet the ever-increasing demand for dual display, ultra-fast data transmission rates, and lossless 4K video resolution, the CS1942DP is specifically designed for where multitasking is needed such as design, financial trading, and video post production.

### Note:

As is common with DisplayPort KVM switches, switching between KVM ports in an Extended Desktop setup may cause windows open on the extended desktop to be resized/repositioned back to a default configuration on the main display. This is due to the nature of the DisplayPort protocol and may require a manual readjustment.

### Note:

1. DisplayPort Dual-Mode technology (DP++) does not require an active adapter for most single display setups. Active DisplayPort adapters are recommended if you are unsure of the video source's DP++ compatibility.

2. MST ([Multi-Stream Transport](#)) requires either monitors that are capable of [DisplayPort 1.2](#) daisy-chaining, or use of a powered DisplayPort [MST](#) Hub. A DisplayPort v1.1a display can be the last display in a DisplayPort v1.2 chain. The PC source must be [DisplayPort 1.2](#) compliant

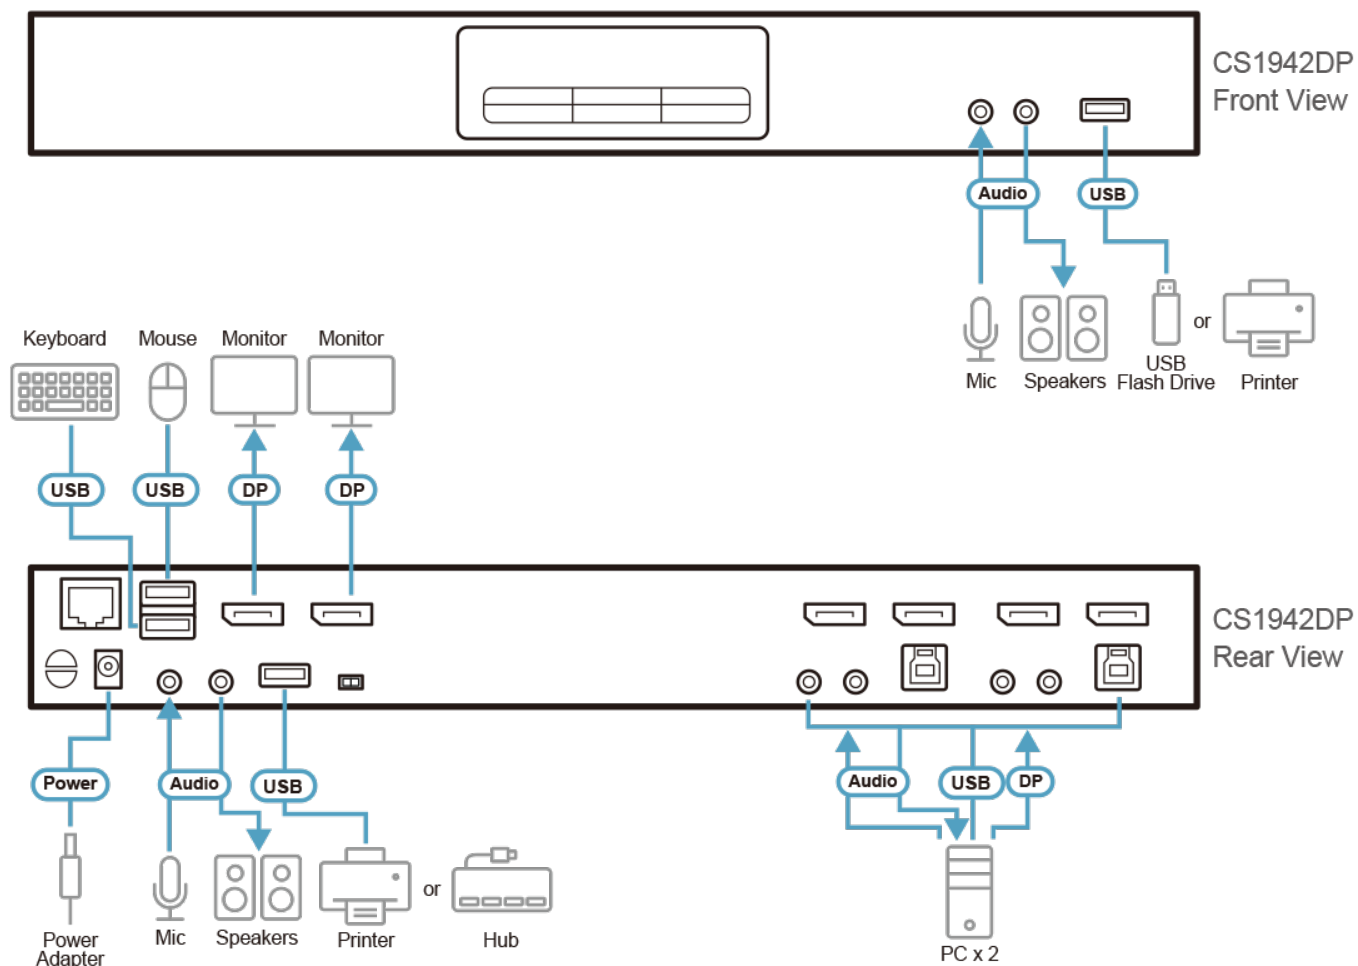

3. For DisplayPort 1.4 compliant display device, make sure to configure the device setting to be compatible with [DisplayPort 1.2](#) to avoid compatibility issue.

4. HD audio through DisplayPort cannot be switched independently
