Simply Better Connections

KH88

8-Port High-Density KVM Switch

Modernize your network management by controlling up to 8 servers from one KH88 KVM Console. Altusen's KH88 is equipped with eight hot pluggable ports for easy server room management. All ports have PS/2 emulation, so if you reboot any server on the console, it will not halt at bootup looking for a mouse or keyboard. With one KVM switch managing 8 systems, you can save an enormous amount of deskspace by not having the need for 7 extra monitors, mice and keyboards.
