KE0220

Audio KVM Extender

The KE0220 Audio KVM Extender enables a user at a local keyboard, video, mouse (KVM) console-and a user at a remote KVM console up to 200m away-to access a computer or KVM installation. It provides full audio support for a microphone and stereo speakers.The KE0220 can connect to any ATEN KVM switch that has PS/2 connectors. A built-in custom ASIC ensures stability, reliability and compatibility with your KVM installation.The KE0220 senses the distance and automatically adjusts the video signal gain for the highest quality picture. A manual gain control also is provided at the remote console to fine tune the video.

Egenskaper

- Built in ASIC chip for greater reliability and compatibility
- Uses inexpensive Cat 5e cable to connect the local and remote units up to 200m (660 feet) apart
- Audio support for long distance microphone and speaker control
- Adjustable gain control-manually adjusts signal strength to compensate for distance
- High video resolution up to 1600 x 1200
- Supports DDC2B for local monitor (Display Data Channel for communication between graphic card and monitor)
- PS/2 and Microsoft Intellimouse Support
- Dual console operation-control your system from both local and remote consoles
- Firmware upgradable
- Multiplatform support: Windows 2000/XP/Vista, Linux., Unix and FreeBSD.
