Global Control and Scheduling

Perform and schedule routine tasks and firmware upgrades across multiple devices simultaneously.

Device Group Control

Execute actions instantly across multiple devices simultaneously, such as switching ports, profiles, resolutions, and video off.

Event Scheduling

Schedule routine tasks for devices to carry out, such as setting different video contents to display at specific times of the day or week.

Schedule Event 1 Event 2 Event 3 Event 4

Room View

View information for individual devices located in a single room.

User Roles and Access Levels

Define User Roles and respective permission access levels on a room-by-room basis so that information can be accessed by relevant people only.

The screenshot shows the ATEN Unison web interface. On the left, a sidebar menu includes 'Devices', 'Schedule', 'Users' (selected), 'Logs', and 'Settings'. The main area displays a list of users: 'Administrator', 'Mike', 'Gary', 'Loo', and 'mike' (selected). A modal dialog box is open for the 'mike' user, titled 'Basic'. It contains fields for 'Username' (mike), 'Password', 'Confirm Password', and 'User Type' (Administrator selected). The 'Access' tab is visible but empty. At the bottom of the dialog are 'Discard' and 'Apply' buttons. The footer of the page reads 'ATEN International Co., Ltd. All rights reserved.'

Features

ATEN Unizon™ is a server-based software for remote centralized monitoring, control, and management of Ethernet-based ATEN Video Matrix Switches, ATEN Room Booking System, and 3rd party devices (such as projectors, lights, and AV devices) connected to ATEN Control System Controllers.

By providing real-time access to device status, the platform streamlines daily AV/IT management, troubleshooting, analytics, and automation, making it the perfect solution to manage mass device deployments.

ATEN Unizon Timetable enables calendar syncing in real-time with RBS panels allows users to create /upload events on ATEN Unizon, streamlining the entire process of managing meeting spaces within an organization. User profiles are manageable via the RBS Panel-connected [VK401](#), enabling ATEN Unizon to restrict access rights only to the authorized person. Besides, by integrating with VK control system, ATNE Unizon allows for facilitating conference room automation solutions.

- Centralized device monitoring, control, and management
 - ATEN Video Matrix Switches, Room Booking System, Control System solutions, including the managed third-party devices
 - Detection of device statuses, such as lamp hour of a projector and connection status for remote troubleshooting and maintenance
 - Batch device control and firmware upgrades
- Intuitive user interface for large-scale Pro AV applications, easy room monitoring and management across multiple locations
 - 5-level deployment tree
 - Supports room view and floor view
 - Configurable users access rights
- Predefined scenarios for automation and task scheduling
 - Provide meeting scenarios to choose and triggers actions from controllers
 - Automatically turn on / off lights, air-con, meeting room devices based on predefined actions
- Dashboard for current status and analytics
 - Current status info for real-time troubleshooting
 - Analytics of past usage records for future optimization
 - Preset rules for generating regular reports for optimizing device maintenance arrangement
- User profiles are managed in the Directory, including user name, email, pin code and card numbers etc
- Logs device usage, notifications, and emails for abnormal events for usability analysis and future optimization
- ATEN Unizon Timetable allows for calendar syncing in real-time with RBS panels to users to create / upload multiple events in one time on ATEN Unizon
- Supports mainstream web browsers
- License of different amount of controlled devices can be purchased based on users' need
