

CE790T

Digital USB Console Extender w/ Audio Support (Transmitter)

The CE790T is transmitter half of the [CE790](#) digital KVM extender set and is also sold separately to expand your capabilities.

The CE790T connects to a receiving unit [CE790R](#) over your network. An intuitive On Screen Display (OSD) simplifies set up and connections. The number of Receivers and Transmitters that can be connected is limited only by the number of free IP Addresses on your network. More information on the CE790T can be found on the [CE790](#) web page.
