

CS18208

8-Port USB 3.0 4K HDMI KVM Switch

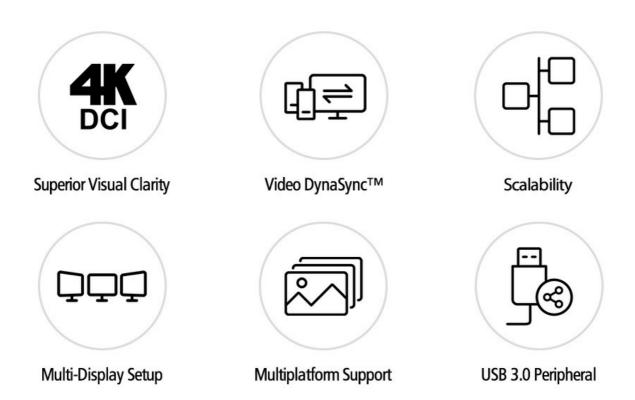

Maintaining effective IT operations is crucial to keeping businesses and services running. With workforces navigating the adjustments of the new normal, sustaining 24/7 uninterrupted IT services while remaining competitive has become more mission-critical than ever. Meanwhile, as the amount of data has continued to grow exponentially over the years, boosting operational efficiency remains the focal point for data center and server room professionals as they strive to streamline routine procedures in automated processes, such as data entry, feature testing, BIOS flash, system updates, and much more.

The CS18208, featuring superior 4K video quality, USB 3.0 peripheral agility, and space-saving rackmount capability, allows 8 computers to be centrally controlled via a single console where IT engineers are enabled to expedite system operations by configuring multiple units simultaneously instead of working one at a time; routine or repetitive tasks and procedures can be promptly replicated and broadcasted on multiple computers in seconds, slashing time, space, and cost, while pursuing strengthened enterprise productivity.

Spectacular 4K DCI Visual Performance

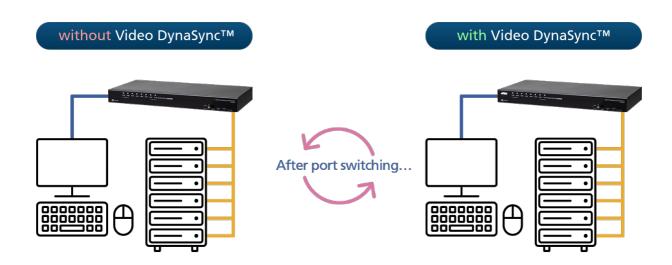

With connection to HDMI or DisplayPort-enabled computers, 4K USB 3.0 Rack KVM Switch series effortlessly enriches console desktop operations with up to 4K DCI (4096 x 2160 @60 Hz) visual excellence. Video sources of high resolution visuals and imaging are displayed with great precision for improved analysis.

Video DynaSync™

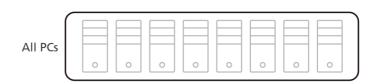

Empowered by patented ATEN technology – Video DynaSyncTM, Rack KVM Switches deliver a smooth viewing experience by maintaining the ideal video settings under all operating systems when switching between ports, speeding up switching between systems, and powering up uninterruptedly while eliminating boot-up display problems.

Broadcast Mode to Expedite Timely Configurations

The practical and efficient Broadcast Mode can be easily invoked via OSD or serial commands to perform the same task or command simultaneously on all connected computers across different OS platforms, including software installation and upgrading, function testing, BIOS flash update, system-wide shutdown, and more, making server management effortless and hassle-free.

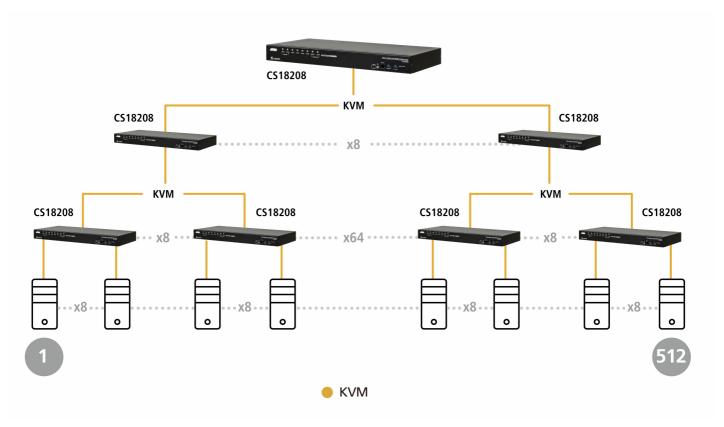

Cascadability to Upscale Server Management Efficiency

The number of connected computers can be scaled up to 512 by cascading the CS18208 in 3 levels, leaving room and flexibility for network expansion when needed.

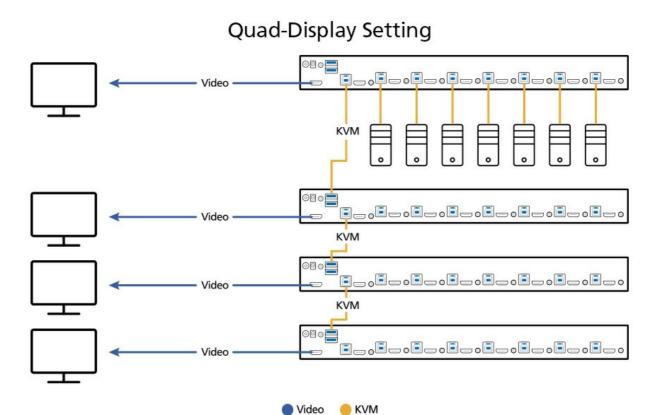

Resilient Multi-Display Setup to Facilitate Live Feeds

When a large amount of complex content needs to be viewed at once or there's a need to examine intensive data for analysis, up to 8 Rack KVM Switches can be stacked up to allow up to 8

monitors to be set up in a multi-display configuration (such as dual- / triple- / quad-display) to facilitate live feeds among computers at the console desktop.

Superb Data Transfer Rate for Swift Peripheral Sharing

The built-in 2-port USB 3.1 Gen 1 hub supports plug-n-play connection to two peripheral devices (e.g., printer, scanner, flash drive, etc.) for high-speed data transmission of up to 5 Gbps transfer rate, making console desktop operations agile and efficient.

Flexible Port-Switching Methods for Uplifted Productivity

Port switching is as easy and convenient as pressing the front-panel pushbuttons, pressing supported hotkeys, using the OSD, or entering RS-232 commands, whichever works best for you.

Space-Efficient 2-in-1U Rack Mounting

The ATEN 2-in-1U Mounting Kit (model: 2K-0001 / 2K-0002) enables the housing of an ATEN Rack KVM Switch with an ATEN Ultra Short Depth LCD Console in a 1U rack space, facilitating rack installation with optimum space efficiency.

Features

The ATEN CS18208 8-Port USB 3.0 4K HDMI KVM Switch can effectively access and control up to 8 HDMI computers from a single USB keyboard, USB mouse, and HDMI monitor console. The CS18208 supports high video quality up to 4K DCI (4096 x 2160 @ 60Hz), presenting crystal-clear visuals.

To meet the needs of easy expansion and flexibility, the CS18208 can control up to 512 computers by cascading to three levels for a single console. Furthermore, the CS18208 supports multidisplay function by stacking up to eight CS18208 units to compare and analyze information on 8 monitors at most, which substantially streamlines the working environment.

With two patented ATEN technologies – Video DynaSync™ and EDID Expert™, the CS18208 can optimize display resolution, accelerate switching between ports and power up smoothly while eliminating boot-up display problems.

Besides, the CS18208 comes with a built-in USB 3.1 Gen 1 hub delivering data transfer rates up to 5 Gbps, allowing users to speed up operations and share USB peripherals instantly. For userfriendly port selection methods, the CS18208 offers pushbuttons, hotkeys, RS-232 commands, and OSD with newly-designed UI, bringing effortless and intuitive operations.

To eliminate security concern, a two-level password authorization is available to enhance security protection for accessing and controlling computers. Consolidating these advantageous functionalities, the CS18208 is ideal for server room or computer room management applied in industries with requirements for high-quality images and multitasking, such as enterprise, government, production, telecom, finance, media, content provider, video surveillance, etc.

- One USB console controls up to 8 HDMI interface computers and two additional USB 3.1 Gen 1 peripheral devices
- Cascadable to three levels controls up to 512 computers ¹
 Multi-Display feature stacks up to eight CS18208 units and display video from up to 8 monitors (dual display / triple display / quad display / multi-display)
- Video DynaSync™ an exclusive ATEN technology that eliminates boot-up display problems and optimizes the resolution when switching among different sources
- EDID Expert™ selects optimum EDID mode for smooth power-up and highest quality display
- Superior video quality up to 4K DCI (4096 x 2160 @ 60Hz)
 Built-in 2-port USB 3.1 Gen 1 hub with SuperSpeed 5 Gbps data transfer rates
- Audio enabled full bass response provides a rich experience for 2.1 channel stereo sound
- Supports HD audio²
- Computer selection via pushbuttons, hotkeys, OSD, and RS-232 commands
- Independent switching of KVM and USB peripheral focus ³
- Two-level (administrator / user) password authorization for enhanced security protection
- Broadcast mode operations can be simultaneously performed on all selected computers, such as software installation and upgrading, system-wide shutdown, etc.
- Auto Scan Mode for monitoring all computers
- Console mouse port emulation / bypass feature supports most mouse drivers and multifunction mice
- Multilingual keyboard mapping supports English (US), English (UK), German (GER.), German (SWISS), French, Hungarian, Italian, Japanese, Korean, Russian, Spanish, Swedish, Traditional Chinese, and Simplified Chinese
- Mac / Sun keyboard support and emulation ⁴
- Supports hot-plugging HDMI compliant; HDCP 2.2 compliant
- Multiplatform support Windows, Linux, Mac, and Sun
- Firmware upgradable
- Supports multimedia, wireless keyboards and mouse

Note:

- 1. CS18208 cascades to CS18208 only.
- 2. HD audio through HDMI channel cannot be switched independently.
- Independent switching is only supported under mouse emulation mode.
 PC keyboard combinations emulate Mac / Sun keyboards; Mac / Sun keyboards work only with their own computers.
