

PE6108

15A/10A 8-Outlet 1U Metered & Switched eco PDU

- 8 outlets
- 15A (UL derated 12A) / 10A PDU Power Measurement

The PE6108 eco PDU is intelligent PDUs that contains 8 AC outlets and is available in various IEC or NEMA socket configurations. It provides secure, centralized, intelligent, power management (power on, off, cycle) of data center IT equipment (servers, storage systems, KVM switches, network devices, serial data devices, etc.), as well as the ability to monitor the center's health

The eco PDUs offer remote power control combined with real-time power measurement - allowing you to control and monitor the power status of devices attached to the PDUs at the PDU device level from practically any location via a TCP/IP connection.

The eco PDU supports any 3rd party v3 SNMP Manager Software and the eco DC (Energy Management Web GUI). The eco DC provides you with an easy method for managing multiple devices, offering an intuitive and user-friendly Graphical User Interface that allows you to configure a PDU device and monitor power status of the equipment connected to it. With the eco DC, the Sensor-enabled eco PDU also offers comprehensive power analysis reports which can separate by departments and locations, providing precise measurements of current, voltage, power and watt-hour in a

With its advanced security features and ease of operation, the eco PDU is the most convenient, most reliable, and most cost effective way to remotely manage power access for multiple computer installations and allocate power resources in the most efficient way possible.

Note: Sensors are optional accessories. A sensor-enabled installation is required to generate a more complete energy-efficient data and chart. Higher sensor installation density is helpful to

Model	Power Cord (IEC C19 to)	Outlets	Monitoring Level
PE6108A	NEMA 5-15P	NEMA 5-15R	PDU
PE6108B	NEMA 6-15P	IEC C13	PDU
PE6108G	IEC C14	IEC C13	PDU

Features

Power Distribution

- Space saving 1U rack mount design with rear mounting
- IEC or NEMA outlet models
- 3 digit 7-segment front panel LED shows Current / IP Address
 Remote users can monitor outlet status via web pages on their browsers
- Separate power for the unit's own power and its power outlets. The user interface is still accessible even when an overload condition trips the devices' circuit breaker

Remote Access

- Remote power control via TCP/IP and a built in 10/100 Ethernet port
 Network Interfaces: TCP/IP, UDP, HTTP, HTTPS, SSL, SMTP, DHCP, NTP, DNS, 10Base-T/100Base-TX, auto sense, Ping, Telnet
- eco PDU Power Management software eco DC
- Supports SNMP Manager V3

Operation

- Remote power outlet control (On, Off, Power Cycle) by individual outlets
- Power-on sequencing users can set the power on sequence and delay time for each port to allow equipment to be turned on in the proper order Easy setup and operation via a browser-based user interface
- Multibrowser support (IE, Firefox, Chrome, Safari)
- RTC support to keep the timer running during times of no power.
 Supports up to 8 user and 1 administrator accounts
- Proactive Overload Protection (POP) automatically powers off outlets when current overloads to protect operating devices

Management

- Power status measurement at the PDU level
- LED indicators for current and IP address at the PDU device level
- used UI for monitoring at the PDU level and kWH displayed in a browsed-ba
- Current and voltage threshold setting
- Naming support for outlets
- User outlet access assignment on an outlet-by-outlet basis.
- Event logging and syslog support
- Upgradeable firmware
- Multilanguage support: English, German, Traditional Chinese, Simplified Chinese, Japanese, French, Spanish, Italian

Security

- Two-level password security
- Strong security features include password protection and advanced encryption technologies 128 bit SSL
- Remote authentication support: RADIUS

• eco DC Energy Management Software

- · Automatic discovery of all PE devices within the same intranet
- Remote real-time power measurement and monitoring
- Remote real-time power outlet management
- Remote real-time environment sensor monitoring
- Plotting/Monitoring of all PE devices
- Exceed threshold alert through SMTP and Syslog
- Power Analysis Report

• Features available only on firmware-upgraded models with -ATB part number

- Supports SMPTS, IPv6, Modbus (Over TCP/IP), Auto Ping, TLS1.2, SSH
- Supports IEEE 802.1X
- Authentication: LDAP, TACACS+
- UI heartbeat, schedule control, mail control, and setting rule
