VE66DTH

6 x 6 Dante Audio Interface with HDMI

ATEN VE66DTH is a Dante-enabled six.input / six.output Audio Interface with HDMI. Using Dante. – the most popular audio networking solution created by Audinate, the VE66DTH is capable of delivering, closeto-zero latency digital audio signals across the standard IP network. The VE66DTH transmits and receives up to 6-channel of audio inputs and outputs via a Dante network. As a pre-amplifier, the VE66DTH supports not only balanced and unbalanced line-level input, but also microphone-level input. Additionally, the device can provide 48V phantom power for condenser microphones. With its built-in PoE (Power over Ethernet), the VE66DTH can be powered by a compatible PSE device through Ethernet cable. Moreover, the VE66DTH provides flexible audio capability with audio de-embedding and embedding. It can de-embed HDMI stereo audio signals to the Dante networking system and embed Dante audio signals into the HDMI output.

The VE66DTH is tailor-made to a wide range of environments, such as conference centers, concert halls, entertainment facilities or wherever that requires implantation of Dante-based professional audio devices for extended and flexible networked AV applications. Users of the VE66DTH can benefit from improved system performance, reduction in cabling and more to installations of all sizes.
