Global AV Management Platform

# **ATEN Unizon**<sup>™</sup>

Global AV Management Platform

#### Your Power to Monitor, Control, Manage

ATEN Unizon<sup>TM</sup> is a server-based software for AV and IT professionals to centrally monitor, control, and manage ATEN Modular Matrix and third-party devices connected to the ATEN Control System Controllers anytime, anywhere.

## GET FREE TRIAL!

Device Condition Monitoring
Real-time monitoring and tracking of device condition for troubleshooting and maintenance.

#### **Condition Detection**

Automatically detects device power status, temperature, fan, and connection status, helping you perform maintenance to avoid potential device failures.

#### Alerts and Notifications

Instantly get notified of device abnormalities to perform troubleshooting actions and reduce down-time.

#### System Log

Device usage and abnormal events are recorded so you can analyze past usability and plan future optimization.

## Global Control and Scheduling

Perform and schedule routine tasks and firmware upgrades across multiple devices simultaneously.

#### **Device Group Control**

Execute actions instantly across multiple devices simultaneously, such as switching ports, profiles, resolutions, and video off.

#### Event Scheduling

Schedule routine tasks for devices to carry out, such as setting different video contents to display at specific times of the day or week.

#### Firmware Upgrade

Remotely update the firmware of multiple devices simultaneously directly through the platform, saving you time and maximizing productivity.

#### Features

ATEN Unizon<sup>TM</sup> is a server-based software for remote centralized monitoring, control, and management of Ethernet-based ATEN Video Matrix Switches, ATEN Room Booking System, and 3rd party devices (such as projectors, lights, and AV devices) connected to ATEN Control System Controllers.

By providing real-time access to device status, the platform streamlines daily AV/IT management, troubleshooting, analytics, and automation, making it the perfect solution to manage mass device deployments

ATEN Unizon also manages user profiles. With VK401 attached to VK430 / VK330, ATEN Unizon gives access rights to authorized personnel when check in on RBS panel. Besides, by integrating with VK control system, it facilitates conference room automation solutions

- · Centralized device monitoring, control, and management

  - ATEN Video Matrix Switches, Room Booking System, Control System solutions, including the managed third-party devices
     Detection of device statuses, such as lamp hour of a projector and connection status for remote troubleshooting and maintenance
  - Batch device control and firmware upgrades
- · Intuitive user interface for large-scale Pro AV applications, easy room monitoring and management across multiple locations
  - 5-level deployment tree
  - Supports room view and floor view
- Configurable users access rights
  Predefined scenarios for automation and task scheduling
- Provide meeting scenarios to choose and triggers actions from controllers Automatically turn on / off lights, air-con, meeting room devices based on predefined actions
   Dashboard for current status and analytics
- Current status info for real-time troubleshooting
- Analytics of past usage records for future optimization
   Preset rules for generating regular reports for optimizing device maintenance arrangement
- User profiles are managed in the Directory, including user name, email, pin code and card numbers etc
- Logs device usage, notifications, and emails for abnormal events for usability analysis and future optimization Supports mainstream web browsers
- License of different amount of controlled devices can be purchased based on users' need

#### Specifications
